

EXERCISE – 11

Question

Execute and display the results for the following Nmap Timing and Performance commands in Kali Linux Operating System:

1. Aggressive Speed Scan
2. Insane Speed Scan

Aim

To execute and display the results of Nmap aggressive speed and insane speed scan commands in Kali Linux.

1. AGGRESSIVE SPEED SCAN

Command:

```
nmap -T4 127.0.0.1
```

Use:

The -T4 option performs the Nmap scan at an **aggressive speed** for faster scanning.

```
(pranathi@kali)-[~]  
$ nmap -T4 127.0.0.1  
Starting Nmap 7.99 ( https://nmap.org ) at 2026-10-07 09:32 +0530  
Nmap scan report for localhost (127.0.0.1)  
Host is up (0.0000010s latency).  
All 1000 scanned ports on localhost (127.0.0.1) are  
in ignored states.  
Not shown: 1000 closed tcp ports (reset)  
  
Nmap done: 1 IP address (1 host up) scanned in 0.05  
seconds
```

2. INSANE SPEED SCAN

Command:

```
nmap -T5 127.0.0.1
```

Use:

The -T5 option performs the Nmap scan at an **insane/very fast speed**.

```
(pranathi@kali)-[~]  
$ nmap -T5 127.0.0.1  
Starting Nmap 7.99 ( https://nmap.org  
) at 2026-10-07 09:31 +0530  
Nmap scan report for localhost (127.0.  
0.1)  
Host is up (0.0000010s latency).  
All 1000 scanned ports on localhost (1  
27.0.0.1) are in ignored states.  
Not shown: 1000 closed tcp ports (rese  
t)  
  
Nmap done: 1 IP address (1 host up) sc  
anned in 0.08 seconds
```

Result

Thus, the Nmap aggressive speed and insane speed scan commands were successfully executed in Kali Linux and their results were displayed.
