**EXERCISE – 25**

**Question**

Write and execute the following programs using Shell Programming in Kali Linux Operating System:

1. Read a number and find its square.
2. Find the biggest of three numbers.

**Aim**

To write and execute shell programs to calculate the square of a given number and find the biggest of three numbers in Kali Linux.

**1. SQUARE OF A NUMBER**

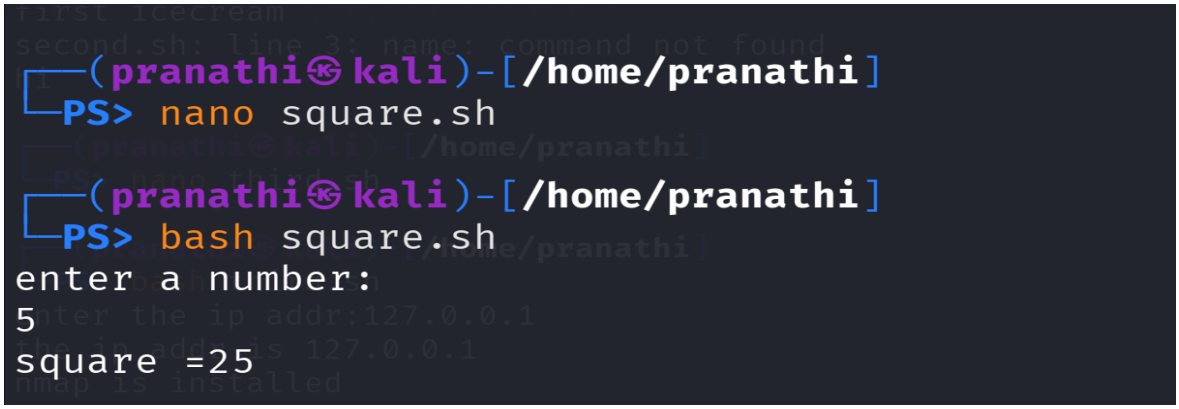

Command:

bash square.sh

**Program:**

```
#!/bin/bash
echo "Enter a number:"
read n
echo "Square = $((n*n))"
```

**Output :**

Use:

**This shell program is used to read a number from the user and calculate its square.**

---

**2. BIGGEST OF THREE NUMBERS**

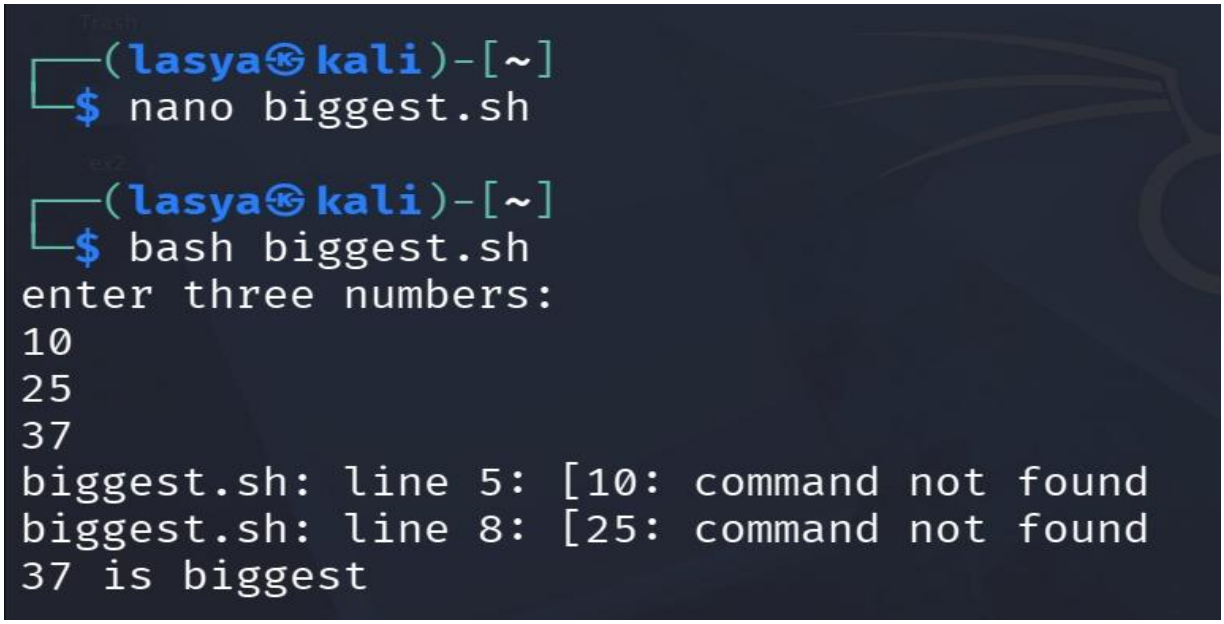

**Command:**

bash biggest.sh

**Program:**

```
#!/bin/bash
echo "Enter three numbers:"
read a b c
if [ "$a" -ge "$b" ] && [ "$a" -ge "$c" ]; then
   echo "Biggest = $a"
elif [ "$b" -ge "$c" ]; then
   echo "Biggest = $b"
else
   echo "Biggest = $c"
fi
```

**Output :**

**Use:**

This shell program is used to compare three numbers and display the biggest number using conditional statements.
